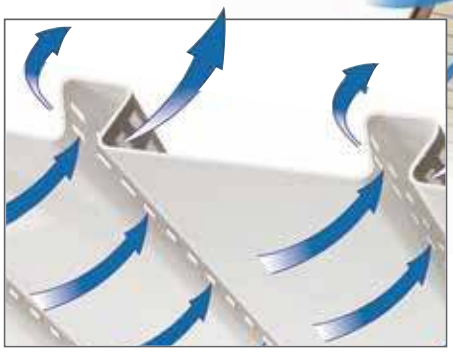
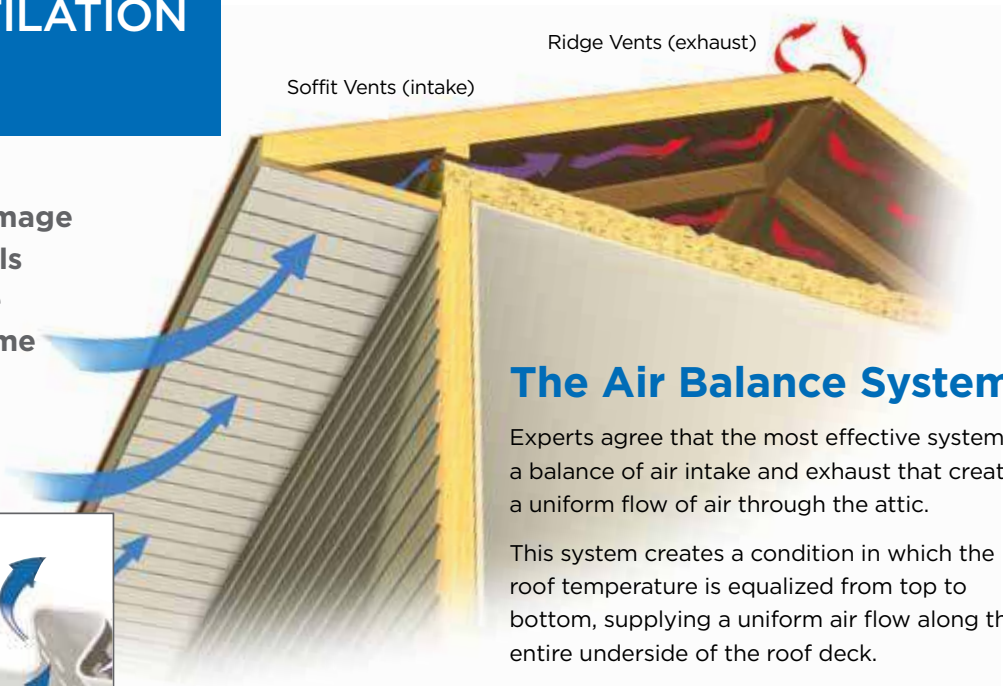
# PROPER VENTILATION IS VITAL

**Protection against damage to the roofing materials and structure increase comfort inside the home and energy savings.**



**InvisiVent Triple 3-1/3" and Perimeter Hidden Vent offers at least 50% more ventilation than most standard vinyl soffit, providing more than 10" of net-free intake area.**

**This means that not only will InvisiVent provide a balanced ventilation system, but will do so with an overhang as short as 10".**



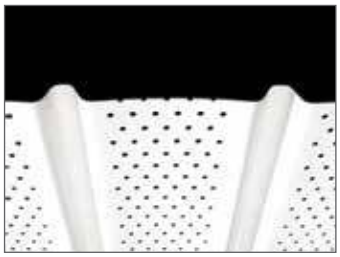
## The Air Balance System

Experts agree that the most effective system is a balance of air intake and exhaust that creates a uniform flow of air through the attic.

This system creates a condition in which the roof temperature is equalized from top to bottom, supplying a uniform air flow along the entire underside of the roof deck.

**Hidden vents provide a smooth, flat non-perforated surface versus most vented soffits with unsightly perforations.**

**InvisiVent Triple 3-1/3"**



Standard vented soffit
